

DIAMOND SHIELD

Advanced Paint Protection System

*Paint Protection Film Product **Maintenance and Registration***

Thank you for choosing **Diamond Shield**, the most trusted paint protection service in Outdoor Recreation. Please take a minute to learn how to easily care for the product that is there to protect your investment!

WHAT IS DIAMOND SHIELD?

Diamond Shield is a virtually invisible protective film applied to the high impact areas of the vehicle in order to protect the painted surface from stone chips, bug damage, UV rays, and minor abrasions.

Diamond Shield provides unbeatable personalized customer service and national coverage by utilizing its certified mobile technicians to accommodate you wherever the road may take you.

REQUIRED REGISTRATION

Registration of your Diamond Shield Paint Protection Film is required in order to activate your warranty. Please visit us on the web at www.diamond-shield.com and submit the warranty registration contact form.

3 STEP EASY CARE PLAN

STEP 1 // WIPE REGULARLY

Wiping bugs and road grime off your vehicle, with a wet soft cloth, as soon as you get a chance is essential to keeping your film looking great. This will also reduce the risk of staining and discoloration from bug acids, runoff stains, and road grime left on for an extended period. When done apply **303 Aerospace Protectant!**

STEP 2 // WASH MONTHLY

Washing monthly will give your film the deep clean it deserves and will ensure the film remains crystal clear. Use **Bug Magic** as a prewash by spraying directly onto the vehicle or use it as a wash aid by adding it to your wash water. **Bug Magic** will drastically reduce wash time, is the only approved bug remover, and is biodegradable! Any liquid car wash solution and soft mitt will work when washing. When you're done don't forget to apply **303 Aerospace Protectant!**

STEP 3 // WAX QUARTERLY

Waxing your film on a quarterly basis, or more, will add that extra layer of protection to your film. Keeping it waxed will prevent damage from bug acids and road grime, and allow the film to effortlessly be wiped clean. We recommend using a synthetic cream wax specifically **Mothers**, or **Meguiars Liquid Cream Cleaner Wax**.

GENERAL CARE PRECAUTIONS

Several cleaning techniques and cleaning products that should **NEVER** be used on the areas protected by Diamond Shield on your vehicle include:

DO NOT: Pressure Wash

DO NOT: Use Rain-X Products

DO NOT: Use Any Abrasive Brushes, Rags, Cloths or Compounds

This general care list is not comprehensive. Please call **Diamond Shield** at **1-888-806-5862** before using any products not specifically listed on our website. Using unapproved sprays, cloths, or waxes may cause damage to the film, which may not be covered under warranty.

Diamond Shield

303 AEROSPACE PROTECTANT

Any areas covered by Diamond Shield should be wiped down with 303 Aerospace Protectant on a regular basis. More specifically, after washes, after wiping off bugs and road grime, and between waxing.

BUG MAGIC

Want to make washing your paint protection easy? Bug Magic's patented formula is designed to quickly break down tough, stuck on insect and tar stains, making wiping them away almost effortless! Safe for use on all paint, graphics and paint protection.

These products are available online at www.Diamond-Shield.com

OUR COMMITMENT

Since 1998, Diamond Shield has steadily earned the trust of more manufacturers, dealerships, and individuals than any other paint protection company in outdoor recreation.

The principal that has guided our company is our commitment to delivering superior quality products and services to our customers. We are devoted to ensuring that every customer feels valued and pleased with their paint protection purchase.
